

We the People

The first black President of United States is sick and tired of the multitude of murders occurring monthly across US soil based on the superiority complex syndrome, ethnic discrimination and taught hate. Ravaging racism is plaguing America, thus by a secret executive order, a special black op Racism Police task force was created. This unique group of military specialists sole purpose be to uproot Racism out of America, but the first black President was unaware that he would be the first person to really need this special group of men and women. Wild fires are flaming, will the President be burned or saved? Will the land of the free be cured of its sickness of apartheid bigotry or do the words written in the Preamble of the US Constitution...We the People, only refer to a certain gender, group or race?
