

The paperback. Pub Date: 2012 Pages: 218 Language: Chinese in Publisher: China Machine Press car repair skills training from the campus to the workplace series: structural principle for automotive air conditioning and a typical fault cases First of automotive air conditioning systems structure and composition. basic knowledge of important concepts and basic principles were summarized. and then explain in detail the automotive air conditioning refrigeration systems. electrical control systems and ventilation. gas distribution. heating system composition. working principle and detection methods. and full automatic air conditioning were carefully explain and summarize a more practical car air-conditioning systems maintenance. Believe that the publication of this book will give readers maintenance improvements in technology to bring great help. Car repair skills training was wri...
