

This book is based on the proceedings of the first of a new International Conference series convened to increase the awareness of the potential of new supercomputers amongst scientists and engineers. These 17 papers deal with algorithms for supercomputing, distributed computer systems, as well as user experience and benchmarking. A further 22 selected papers are published in a companion volume entitled Applications of Supercomputers in Engineering: Fluid Flow and Stress Analysis Applications, edited by C.A. Brebbia and A. Peters. Both volumes will prove essential reading for all industrial researchers and academics who are involved in calculations using supercomputers and also for those wishing to become aware of future possibilities.

Principles of Polymer Processing (Society of Plastics Engineers Monographs), On The Go, Health and Safety Statistics 1983, I Am Nine, Chiltons repair and tune-up guide, Subaru, 1970-78, Deburring and Edge Finishing Handbook, Nautical Archaeology: A Handbook, Firefighting in Frederick (Images of America), [Water Wheels or Hydraulic Motors] By Bresse, Jacques Antoine Charles (Author) [2003] [Paperback],
