

Visual Development (PERSPECTIVES IN VISION RESEARCH)

This is the second edition of a text devoted to the development of the visual system. The author is one of the leaders in the field of visual neuroscience, currently one of the hottest areas in neuroscience. Visual Development, 2e, covers (i) development of the visual system, (ii) effects of visual deprivation, (iii) mechanisms by which visual deprivation produces its effects, and (iv) a list of some fundamental questions that need to be answered.
