

This is the second edition of a text devoted to the development of the visual system. The author is one of the leaders in the field of visual neuroscience, currently one of the hottest areas in neuroscience. Visual Development, 2e, covers (i) development of the visual system, (ii) effects of visual deprivation, (iii) mechanisms by which visual deprivation produces its effects, and (iv) a list of some fundamental questions that need to be answered.

Parts Management Models and Applications: A Supply Chain System Integration Perspective, Braced Frameworks: An Introduction to the Theory of Structures (Structures and solid body mechanics series), Energy Efficient Transformers, Industrial Power Engineering Handbook (Newnes Power Engineering Series), Remote sensing image retrieval(Chinese Edition), The Machine Vision Sourcebook, True Love 2: Entfesselt LESEPROBE (True Love - Reihe LESEPROBE) (German Edition), Remote Sensing: Techniques for Environmental Analysis,;
