

Various topics related to Hot Isostatic Pressing are presented in this volume. As well as papers on more general aspects of HIPing, the papers are organised into four groups: metals and alloys, ceramics, HIP-engineering, and HIP-fundamentals. Castings, powder metallurgy, intermetallics, surface engineering and diffusion bonding are covered in the first group. The papers on ceramics give special attention to HIPing of structural and functional ceramics as well as to ceramic composites. Some interesting HIP-engineering innovations are presented on HIP equipment and HIP-technology. The papers which discuss HIP-fundamentals focus around materials modelling and component modelling.

Locomotive Engine Running and Management, Bisi Bee: Sacrifice of a Remarkable Mother, One Bomb Away: Citizen Empowerment for Nuclear Awareness, Sound, Structures, and Their Interaction, Network+ Exam Guide (Exam Guides), Grapefruit, A Turn In The Road, Engineering Drawing, Introduction to Inverse Problems in Imaging,
