

Aero Engines, Magnetos and Carburetors (Classic Reprint)

Excerpt from Aero Engines, Magnetos and Carburetors To the aviator of the future, this book is dedicated by the author, with the hope that it may aid in smoothing the difficulties from the path of some of those who are endeavouring to qualify as pilots. It is not intended as an exhaustive treatment of the subject of aeroplane engines, or as a technical work, nor does the author profess to be an expert authority. Every endeavour has been made to write in simple everyday language on a subject necessarily somewhat technical, so as to bring it within the capacity of the amateur. During many years of experience with engines of the types dealt with, the writer has gathered a quantity of information valuable to the learner and publication of this has been urged upon him by those in touch with his work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
