

A study of multispectral image processing and pattern recognition. It covers: geometric and orthogonal moments; minimum description length method for facet matching; an integrated vision system for ALV navigation; fuzzy Bayesian networks; and more.

Handbook To The Roman Wall: A Guide To Tourists Traversing The Barrier Of The Lower Isthmus (1895), Energy Saving and Storage in Residential Buildings (Energy Science, Engineering and Technology), Residues & Effluents: Processing & Environmental Considerations, Lubrication for Industry, Accelerating Technology Transition: Bridging the Valley of Death for Materials and Processes in Defense Systems, digital circuits and logic experimental design and application,
